

SONUS

The logo features the word "SONUS" in a sans-serif font. The letters "S", "O", "N", and "U" are dark blue, while the letters "S" and "U" are bright pink. A light gray diagonal bar runs from the bottom left to the top right, passing behind the letters.

- ★ Minimal, interfaceless, audiovisual **web space**
- ★ Users can experiment with alternative sound-driven forms of **collaboration**
- ★ Goal: The discovery of unexpected user behaviours and **unique outcomes**

- ★ **Openness** of Sonus Room breaks away from the tedious process of tying yourself to an online persona
- ★ Anonymity and simplicity allowing for rich, **instant interactions**
- ★ Encouraging people from **around the world** to act and react as if they were in the same actual room

PROJECT ITERATIONS

★ **Prototype 1**

- Server connexion
- Basic keycode to sound conversion
- Send one request every key tap
- Plus another request every 100ms to get keys

★ **Version 1.1**

- Fixed server overload issue
 - Created a buffer (array) of notes
 - Get sent and received at once every 100ms
- Reassigned keys from QUERTY to physical order

★ Version 1.2

- Midi to frequency notes
 - (The fundamental - 55Hz)
- Limit to specific scale for harmonic sounds
 - C Major Scale
- Redesigned visuals

★ **Version 1.3**

- Designed intro screen
 - Animated logo
 - Instructions
- Favicon, open graph, meta tags, description
- Made multitouch work on mobile

★ Version 1.4

- Programmed modular instruments
 - Oscillator type: Tri, Saw, Sine, Square
 - Attack level + time, release level + time
 - Decay, Sustain
- Attempted noise-based drums
 - Sounded too different
 - Duplicated code

★ **Version 1.5**

- Scrapped sound-based drums
- Tweaked instruments to sound coherent
- Created visual variations for each instrument

WHAT I LEARNED

- ★ Live database connexion using Ajax (JS + PHP + MYSQL)
- ★ Overcoming server limitations
- ★ Particles simulations, with vectors
- ★ Music theory (Fundamental frequency & synth)
- ★ Optimizing sketch/canvas for performance

WHAT'S NEXT

- ★ Final exhibition
- ★ Testing on more devices
- ★ Find a way to make it more secure
- ★ Try connecting using websocket?
